Overview

Neem AZAS is a Neem based botanical insecticide formulation containing 3000 ppm Azadirachtin.

Neem AZAS is a systemic bio-pesticide and has multiple modes of action for control of insect pests.

Insect Control

Effective in controlling sucking and chewing pests including mites, white fly, thrips, aphids in cabbage and cotton; american bollworm in cotton; flea beetle, mealy bugs, jassids in grapes. Acts as an anti-feedant, insect growth regulator and as a repellent and ovipositioning deterrent. Also, Insects will fail to mature and reproduce and reduced the incidence of leaf eating caterpillars in crops.

Recommended Dosage/ Usage

-  3 to 4 ml per litre.
-  Apply as a prophylactic and/or at early stage of insect attack.
-  Ensure complete coverage of canopy.
-  Repeat spray at 7-10 days of interval based on the pest load.
